

Search for Video and Export

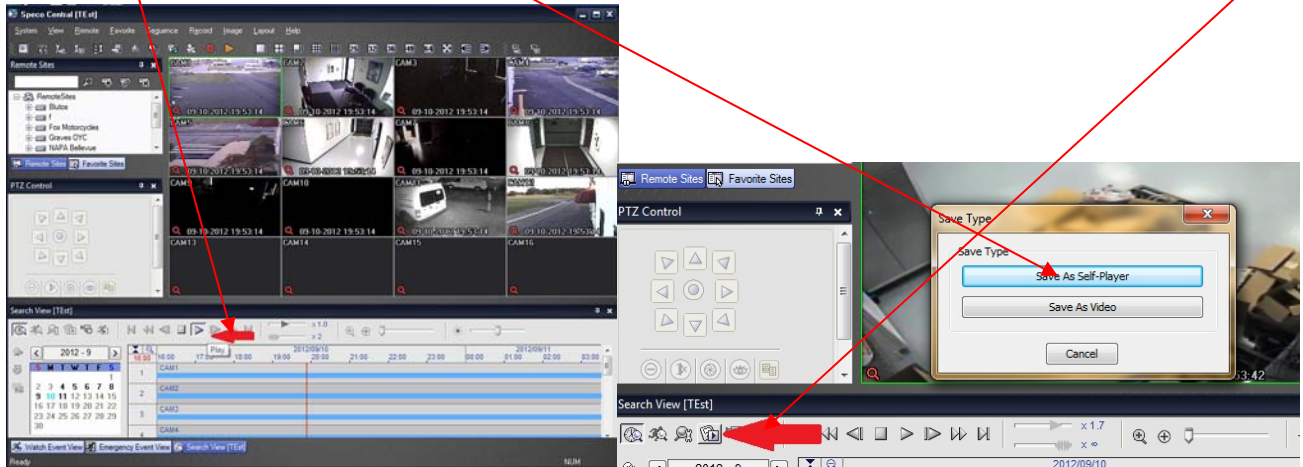

1. Launch the Speco Central software and connect to your DVR then select Search.

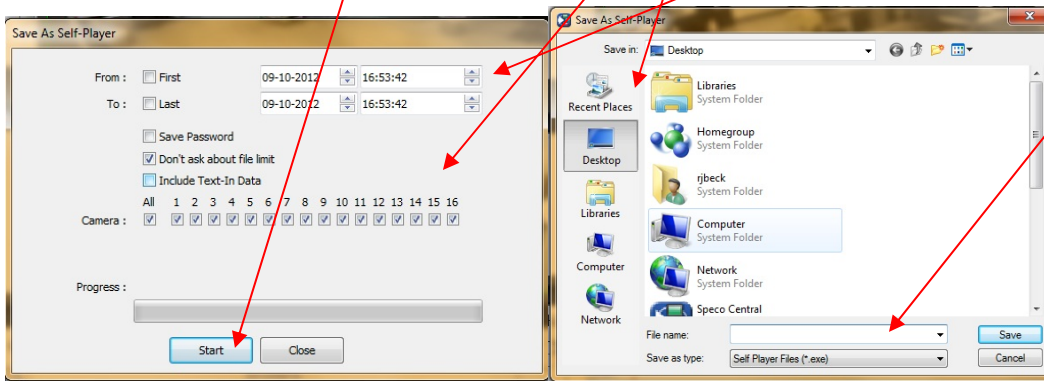

2. Select from the calendar in the bottom left corner the date you wish to search and then select time to the right with mouse to select time with Red slider line.

- Then click the Play button to start playing back video. Once you find what you want to Download click the Save as Video button. Then select the Save As Self-Player.

- When the pop up menu appears choose the cameras and start & end date and time you wish to download to a self-player. Then click start button to choose the location to download video self-player to and name file.

- After file has been saved you are ready to playback or transfer to any media. The file will look like this and the self-player when launched.
